Course Name: CSP297

Course Title:

Project Based Learning-2

Department:

Computer Science and Engineering

Institution:

Sharda University

Project Title:

Smart Campus Management System

Team Members:

Prinsa Tuladhar

Ridhima Prajapati

Project Description:

The Smart Campus Management System is designed to improve communication and resource management within a university campus.

The system allows students to view notices, check attendance, access study materials, and communicate with faculty members.

The objective of the project is to simplify campus operations through a centralized digital platform.

Project Duration:

January 2025 to May 2025

Project Features

1. Student Login System

Students can securely log in to access their academic information.

2. Attendance Tracking

Students can view attendance records in real time.

3. Notice Board

Faculty members can publish notices and announcements.

4. Study Materials

Students can download notes, assignments, and lecture materials.

5. Feedback System

Students can submit feedback regarding courses and campus facilities.

Expected Benefits

- Improved communication between students and faculty.
- Faster access to academic resources.
- Better management of campus activities.
- Reduced paperwork and administrative workload.
